

BECOMING A MAN — 2026

Priorit y	Aspect	Current Rating (/10)	What Real Progress Looks Like by Year-End
0	Lifestyle Hygiene	5	Sleep–wake rhythm is predictable. Nicotine is irrelevant or gone. Days feel stable instead of chaotic. Energy is consistent across weeks, not dependent on motivation.
1	Body Recovery & Regulation	5	Body feels predictable and trustworthy. No background pain or constant scanning. Posture corrects itself without conscious effort. Training feels restorative, not compensatory.
2	Attention Control / Focus	4	You can produce 90–120 minutes of real output most days. Focus doesn't collapse when conditions aren't ideal. Distraction no longer derails the entire day.
3	Skill Development (Leverage Skills)	4	One core skill compounds visibly. You can show proof of competence, not just understanding. Skill work feels boring, repeatable, and reliable.
4	Emotional Regulation	7	Emotions are felt without spiraling or narration. Discomfort doesn't trigger avoidance or numbing. Decisions remain aligned even when mood fluctuates.
5	Identity Consistency	6	Actions align with standards without self-talk. No need to explain growth. Less self-monitoring, more quiet confidence and follow-through.
